INTRODUCTION

Dear student,

This Company Guide serves to guide you through your Jobfair experience. In this guide, you will find detailed information about all companies attending the Jobfair and looking for young

and passionate engineers. At the end of the Company Guide you can also find some

promising start-ups who are eager to find new talent to strengthen their team.

During the first semester we as VTK Corporate Relations had the privilege to welcome many of you to our different events. There you were able to get in touch with a variety of companies, representing a wide range of sectors. Now we are more than happy to welcome you to our VTK Jobfair, the ideal place to dive into your future! A wide variety of companies is present to answer all your questions and to offer their open positions. The engineering job market has been booming for years and still is today! Take your time to visit your favorite companies, and you will notice your dream job is within arm's reach.

We wish you the best of luck not only today but also during the rest of your career.

VTK Corporate Relations 2022-2023 August, Gilles, Jethro, Marie, Mathias, Ruben and Vincent

WE'RE HIRING

YOUNG POTENTIALS

Your digital journey, your better tomorrow

Digital business transformation is what we do. Making sure organizations are ready to deliver for the end customer of today and those of tomorrow. As a European end-to-end partner active in 5 countries in Europe (the Netherlands, Belgium, Denmark, Slovenia and France) we achieve goals, boosted by inspired thinking in our focus markets sectors: Manufacturing, Wholesale & Distribution and Services. We combine Technology & Engineering expertise with Business expertise.

Aim for the stars

9altitudes is committed to developing expertise among all 9A Heroes. With the Young Potentials Academy, we give new graduates the chance to start and grow in our organization. Our objective is to create an exciting and engaging learning journey wherein technology, business and personal leadership are the major pillars.

In our blended learning approach, we mix enthusiasm with experience. Our experienced employees play a major role in this and love to share their expertise and know-how with our Young Potentials - involved to evolve, together with you.

Meanwhile, in Belgium we have trained more than 50 Young Potentials over the past 5 years, with the majority still part of the 9altitudes family. From September 2023 onwards, we will be working towards a Corporate Young Potentials Academy that will also include France, The Netherlands, Slovenia and Denmark.

We are ready to reach new heights ... Are you?

High time to say hi.

Send your CV and motivation to: be.careers@9altitudes.com

FEB

RECRUITMENT OFFER

Our DNA and our corporate culture

ACA Group is a place where people with passion, drive and knowledge come together. Together we put sustainable development and the end user at the heart of everything we do. We like to go one step further for this!

MREE

We do everything we can to provide a professional and motivating working environment. An environment in which teamwork, openness to new ideas, knowledge sharing and recognition are given a central place. After all, we believe that an open and transparent culture ensures that we attract people who want to do excellent work and are rightly proud of it.

mTm

Knowledge, passion and innovation are keywords for us. That is why we founded the ACAdemy, a place to share our knowledge internally and externally and to learn continuously.

ПЯПЦ

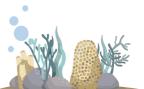

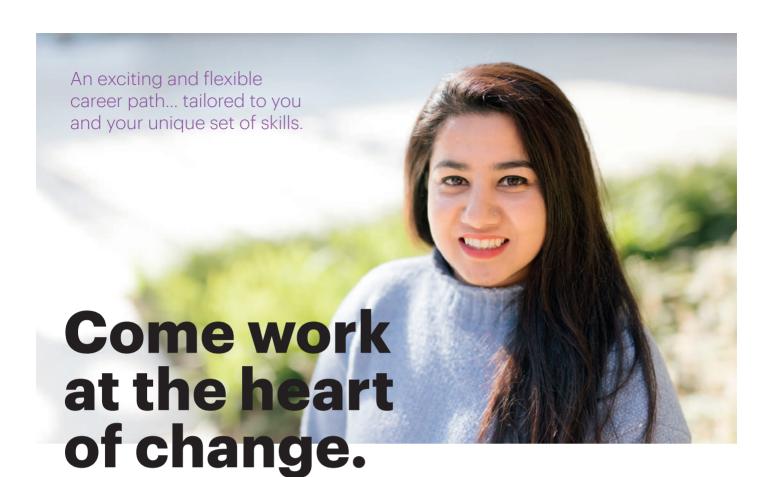

Steve Jobs did not invent the computer.
Adolphe Sax did not invent jazz. Elon Musk did not invent the car. And we did not invent change. But at Accenture, we create it every day. Change is all around us. And it is by embracing it that we deliver 360° value for our clients, our people and our planet.

The many faces of change

The actual power of Accenture are our people. Because at the heart of every great change, there's a great human. And change has many faces, just like us. We're consultants and experts, but also nature lovers, athletes, creative makers, musicians, activists, travelers, avid readers and urban gardeners. Together, we are the many faces of change.

Come change it up at Accenture

When you work at Accenture, your career is about what you want to be and who you want to be. It's about bringing your skills, your curiosity and your best true self to work every day. You'll match your ingenuity with the latest technology to make incredible things happen. Are you ready to give change a voice? Then let's shout it together: 'Let there be change.'

If you had the chance, what kind of change would you want to make?

COMPANY INFORMATION

At Acolad Digital we create innovative websites with the newest technologies, no doubt that you have already visited one of them! We also implement document management tools that make life easier. Our clients are internationally known. They choose us because we make quality and innovation our priority. We are part of Peolad international, a global company.

RECRUITMENT OFFER

- You will work on state-of-the-art projects.
- Training and coaching are priorities for us, investing in your strengths is what we do best.
- Opportunity to grow. Bring your ideas and we will listen to you and help you to create your own opportunities.
- You may work from home, but we also like it if you occasionally come to the office!

Maak kennis met Silke!

Wanneer mensen me vragen waarom ik vijf jaar geleden koos voor AE, dan is dat om verschillende redenen. Al bij mijn eerste gesprek werd duidelijk hoe hard AE focust op een kwalitatieve projectaanpak met als doel: de klant naar een hoger niveau tillen. En laat dat nu net iets zijn waar ikzelf ook enorm veel belang aan hecht. Op dat vlak was het onmiddellijk een match.

Ook het feit dat AE'ers de mogelijkheid krijgen om te blijven groeien en bijleren sprak me aan. Want groeien doe je hier niet alleen door avondsessies en cursussen te volgen, maar ook door samen met je coach je carrière pad uit te stippelen en vorm te geven. Je staat er nooit alleen voor en "AE'ers helpen elkaar" is een motto dat echt leeft binnen de organisatie. Het was door die familiale sfeer en het feit dat je kan rekenen op een groot netwerk van AE'ers dat ik finaal over de streep werd getrokken.

Ik kreeg snel veel verantwoordelijkheid en was soms onzeker! Dat was bij momenten beangstigend, maar doordat ik steeds terecht kon bij mijn collega AE'ers voor vragen en advies, heb ik nooit het gevoel gehad dat ik er alleen voorstond. Samen met hen vond ik beetje bij beetje mijn weg.

AE-ADAPT AND ENABLE

- r https://www.ae.be/en
- @ Elise.ganne@ae.be
- # Heverlee

COMPANY INFORMATION

We are a Business and IT organization located in Belgium. Our headquarters is in Leuven and besides that we have several satellite offices in Ghent, Antwerp, Groot-Bijgaarden and Hasselt. We help our clients to achieve their strategic goals in the digital world by listening to our customers, understanding their challenges, helping them innovate in the services they want to bring to the market and building the technology needed to do so. We also help to improve the broader internal processes of our customers. In addition, we are also building end-to-end products for customers and our own products within AE Studio. We help our customers define the right strategy, build digital solutions and provide qualitative support and long-term services.

RECRUITMENT OFFER

Every year, we invest in a group of young graduates which follow our apprenticeship. This is an intensive training program where you learn all about the AE-methodology and best practices. Afterwards, you're ready to start on your first project with one of our clients or in AE Studio.

Junior software engineer

- You want to start your career as a software engineer
- On your first project, you can go into different directions: back-end engineering, front-end engineering, data science/data engineering, integration, cyber security and more.

With your critical view on the world and analytical mind, you want to work towards improvement

Junior functional analyst

- You want to gather requirements of business processes and/or applications, analyze them and communicate to stakeholders
- You make the translation into user requirements, functional specifications and/or a clear process model of the customer's business
- You want to be the link between the business of the customer and the developers
- You want to explore the broad spectrum of analysis: functional analysis, business analysis, information management, security analysis, project management, ...

TAKE THE PLUNGE

A workplace that lets you take matters into your own hands. Where you're constantly encouraged to make the most of your talents. And where you and your colleagues make a difference today for a brighter tomorrow. **Are you a go-getter with a resolutely customer-centric outlook? Then we hope to see you soon at AG!**

YOU DECIDE WHICH WAY TO GO.

CIT

COMPANY INFORMATION

What's the purpose of an insurance company? To provide a safety net when you need it most? An extra financial cushion to fall back on when you get older? Support when life throws you a curveball? All of the above, and more. Because we hold ourselves to a higher standard. In our view, an insurer should give you the freedom to live your life to the fullest.

We strive to empower you to achieve your dreams, with peace of mind. Because we care, we give you the courage to dare. By anticipating your needs in the areas that matter to you most - family, home, health, mobility, savings, retirement, business – AG helps prepare you for the future today.

Together with our employees and partners, we offer a complete range of outstanding solutions in prevention, insurance and assistance, with a commitment to deliver maximum support and customer experience

AG Insurance is a Belgian insurance company with approximately 4400 employees.

FEB

RECRUITMENT OFFER

- A top job at the market leader in the insurance sector in Belgium. We are constantly striving to support our customers even better. And for that we count on you.
- An enthusiastic and dynamic team that gets a big 10 for atmosphere and fun.
- The chance to develop yourself continuously, with a wide range of training. Ideal for learning all the skills that can help you to further develop your career.
- More than a job: we offer you a whole career. Do you want to taste something different over time? We guide you and encourage you to use all your talents to the full.
- Good vibes, that's what we're going for. With an extensive wellness program full of sporting activities and inspiring workshops. This way you get more out of your work and your life.
- Of course, the money counts too. That is why you will receive an attractive salary package. And because no one knows what you need better than you, you can put together part of that package yourself.

OOK WEG VAN ONS?

Het Agentschap Wegen en Verkeer (AWV) staat binnen de Vlaamse overheid in voor het beheer van ca. 7.000 km gewest- en autosnelwegen en ruim 7.600 km fietspaden.

Wij hebben heel wat werk en nieuwe projecten de komende jaren. Daarom is AWV op zoek naar nieuwe collega's die mee willen bouwen aan de bruggen en wegen van de toekomst. Agentschap Wegen en Verkeer (AWV) zoekt diverse profielen om mee te werken aan een vlotter, veiliger en duurzamer verkeer. We zoeken werfleiders, werfcontroleurs, analisten, projectmanagers en projectingenieurs, zowel voor wegenbouwprojecten als voor elektromechanische projecten op vlak van netwerk, telematica, bewaking, monitoring en handhaving.

We bieden je boeiend werk, jobzekerheid, een competitieve verloning, een fijne werkomgeving en veel kansen voor persoonlijke groei.

BEKIJK ONZE VACATURES EN ONTDEK GETUIGENISSEN VAN COLLEGA'S OP

WEGENENVERKEER.BE/JOBS

Vlaanderen is wegen en verkeer

Jouw talent is belangrijker dan je geslacht, gender, afkomst, leeftijd, geaardheid, handicap of chronische ziekte. Stel je kandidaat en bouw mee aan het diverse Vlaanderen van morgen!

AGENTSCHAP WEGEN EN VERKEER

FIFCH

- r www.wegenenverkeer.be

- Brussel, Antwerpen, Leuven, Gent, Brugge, Hasselt

AGENTSCHAP WEGEN & VERKEER

COMPANY INFORMATION

Onze wegen verbinden alles met iedereen. Waar je ook rijdt, wandelt of fietst, wie je ook bent, de weg brengt ons samen. Dat lukt alleen als die verbindingen veilig, vlot en duurzaam zijn voor alle weggebruikers in Vlaanderen, nu en morgen. Daar zetten we als Agentschap volop op in. We beheren de 7000 km gewest- en autosnelwegen en ruim 7600 km fietspaden in Vlaanderen met hart en ziel.

Het gaat om meer dan enkel wegen. Denk aan tunnels, bruggen, ecoducten, verkeerslichten, snelwegverlichting, wegmarkeringen ... Maar ook aan ons Verkeerscentrum, dat zich focust op de verkeersstromen op de snelwegen. Met 1300 collega's verdeeld over 10 afdelingen en 23 districten, verspreid over alle Vlaamse provincies hebben we veel expertise en terreinkennis in huis.

De weg beheren we niet enkel fysiek maar ook digitaal. We werken aan digitale bouwmodellen van onze infrastructuur (BIM) en met bijvoorbeeld 'mobilidata' werken we volop aan een toekomst waar zelfrijdende auto's, slimme verkeerslichten en verkeerssturende toepassingen het nieuwe normaal zijn.

RECRUITMENT OFFER

Agentschap Wegen en Verkeer (AWV) zoekt diverse profielen om mee te werken aan een vlotter, veiliger en duurzamer verkeer.

We zoeken werfleiders, werfcontroleurs, analisten, projectmanagers en projectingenieurs, zowel voor wegenbouwprojecten als voor elektromechanische projecten op vlak van netwerk, telematica, bewaking, monitoring en handhaving.

Voor pas afgestudeerde ingenieurs bieden we ook de kans om in te stappen in een traineeprogramma, waarin je als trainee de kans krijgt om gedurende anderhalf jaar mee te werken aan 3 verschillende projecten in 3 verschillende afdelingen, en op die manier te ontdekken waar je interesses en sterktes liggen, en zo door te stromen naar een ideale functie.

- Dijkstraat 8 2630 Aartselaar

COMPANY INFORMATION

An exceptional employer for exceptional talents - like you

Water treatment, sewerage, innovation and the energy transition: hone your skills in unique, complex and challenging projects, using all your knowledge and ability to spearhead solutions to societal challenges. Follow a project from the drawing board to realisation. Analyse and improve sewer systems with a view to avoiding flooding. Or draw up stormwater plans to deal with the effects of global warming. Extraordinary challenges await you, letting you prove your worth as an engineer! We are a unique company with a unique mission, a company employing 1,200 true team players. These are all people who put teamwork above everything else, who derive their energy from working in a team. Not only do we connect with team members, but also with other colleagues, with new disciplines, with customers, local authorities, government and suppliers. But it's not always teamwork. Aquafin staff are perfectly capable of working autonomously, solving knotty problems in changing and sometimes even uncertain circumstances. Such individual responsibility drives motivation!

Join the team!

What we offer:

- Impact and responsibility: the projects in your portfolio are crucial to Aquafin's operations, and you take specific responsibility for them.
- Variety and challenges: you help keep Flanders' waters in check.
- Working towards the same goal: the strategic vision is clear, and you work to achieve it, with your supervisor as a sparring partner.
- Working together in a strong network: lots of contact with internal and external stakeholders, great teamwork and an open culture.
- Opportunities up for grabs: Aquafin is an organisation marked by change. Chart your own course, make your mark, with us helping you develop your talents and promote your career.
- Remuneration package with a clear growth path: a wide range of fringe benefits, including a company car, bicycle leasing, cell phone, hospitalisation insurance, meal vouchers, the option of working from home or in our satellite offices, etc.
- A clear framework offering well-being and flexibility: take control of your work-life balance: flexitime, telework, satellite offices, flex spaces.

COMPANY INFORMATION

Arns Group is a market leader in the management of complex IT projects and systems. Founded in Luxembourg in 2003, we've grown organically to encompass 10 entities with over 1,300 employees in Luxembourg, Belgium, Italy and Greece.

With our focus on getting things done, we help our clients achieve their goals with best-of-breed solutions, superior execution and exceptional services. We offer bespoke software development, data science, infrastructure, digital trust and mobile development to government institutions at national and European level, telecom providers, and financial institutions, among others.

Our bold company culture is built around working hard and playing hard, with a flat and agile structure that lends itself to efficiency and employee empowerment. We value our diverse workplace of close-knit teams and provide a place where everyone can be supported to learn and evolve.

We offer a bold culture and an environment in which you can thrive and be rewarded for your hard work on meaningful and exciting projects. We are constantly growing and encourage our people to dream big, accelerating their careers through learning and development opportunities. You'll work alongside amazing coworkers while being encouraged to be yourself in a role where you'll enjoy a sense of purpose.

MSCE

We're looking for enthusiastic and skilled graduates to work at our Brussels and Luxembourg offices in the following roles:

ПНПП

• Java Developers: You'll learn how to develop in backend and frontend, working closely with Business Analysts on requirements and specifications, while learning the behaviour of project lifecycle and Agile methodologies.

OTHERS

• BI Consultants: You'll get to know all stages of the data warehouse lifecycle, developing data models, data marts and data warehouses and helping with ETL processes and data analysis.

PHD

 Analysts: You'll learn to translate business needs into business processes, functional specifications, mock-ups and data models, becoming familiar with Agile and with BPMN, UML and BPEL modelling.

Atlas Copco

COMPANY INFORMATION

What do you think of when you hear 'Atlas Copco'? In case you already know us, the first word that comes to mind will probably be 'Compressors'. But actually, we are much more than that. We are the number one specialist in high and low pressure compressed air compressors, power groups, construction equipment, as well as industrial tools and assembly systems. We are part of the Atlas Copco Group, a Swedish multinational that will celebrate its 150th anniversary in 2023, and together we are always looking for a better way. In doing so, our focus is on safety, quality, efficiency and optimal performance.

RECRUITMENT OFFER

As Atlas Copco Airpower is the international headquarters of the Compressor Technique Division of Atlas Copco Group, a lot is going on within the organization. As such, we are currently looking for new colleagues in multiple areas and can't wait to discover your enthusiasm and ideas. Currently not looking for a permanent job? No worries! Atlas Copco also believes in tomorrow's talent. As such, we will be happy to offer you a career path that is fully tailored to your needs. Internship? Thesis research? Vacation work? Young Talent? Everything is possible!

BANK VAN BREDA

- | https://jobs.bankvanbreda.be/
- @ vacature@bankvanbreda.be
- Ledeganckkaai 72000 Antwerpen

COMPANY INFORMATION

Bank Van Breda is a Belgian bank for entrepreneurs and liberal professions only. We resolutely choose to be an advisory bank. A bank where customer and banker build a real relationship of trust with each other. That means we are interested in more than the figures and balance sheets of our entrepreneurs: we like to know their dreams and ambitions. Because helping them realise their dreams and ambitions is our mission.

Bank Van Breda has been declared the best employer in Belgium according to Great Place to Work by Vlerick Business School.

No fewer than 98% of our staff consider Bank Van Breda to be a very good organisation to work for. We particularly excel in terms of our organisational culture and values: the family and warm atmosphere, the accessible management, people are central and staff are proud to work for Bank Van Breda, where you are given responsibility and opportunities.

RECRUITMENT OFFER

Within our IT department, we have several interesting positions for young graduates.

You'll work in a modern and creative environment where you are given the opportunity to take on a lot of responsibility.

lot of responsibility.

You can work autonomously, while being coached so that you can continue to grow. Our employees also appreciate flexible working hours, fun after-work activities and the fact that we celebrate successes.

We have a can-do culture where we work in a pragmatic and service-oriented way.

Van burgie tot BASF'er!

Bij BASF Antwerpen maken we werk van de toekomst. Zo schakelen we in de loop van dit jaar volledig over op groene stroom en willen we de eerste klimaatneutrale chemische site zijn. Werk je graag mee aan een duurzame toekomst in een warm team? Dan kan jij bij ons als misschien wel floreren!

Jaarlijks werven we jonge burgelijk ingenieurs aan voor ons Young Graduate traject. In dit programma krijgen ingenieurs de kans om onze verschillende vakdiensten en productie-afdelingen te leren kennen via uitdagende jobs. Eline startte in 2021 aan dit avontuur. Ontdek hoe zij haar eerste maanden beleefde!

Eline Maes
26 jaar
Mechanical Engineering

Via de jobbeurs kwam ik in contact met enkele enthousiaste medewerkers die me vertelden dat er bij BASF ook een grote nood is aan werktuigkundig ingenieurs. Ik solliciteerde voor het Young Graduates programma en ben in september gestart als junior asset manager. Je bent als asset manager verantwoordelijk voor de correcte werking en de onderhoudsstrategie van je installatie. Je komt terecht in een productieomgeving die heel dynamisch is, wat betekent dat elke werkdag anders en uitdagend is!

Bij BASF krijg je de kans om veel te leren met de juiste ondersteuning: je krijgt een meter/peter toegewezen en een hoop behulpzame collega's! Uiteraard wordt dit aangevuld met een interessant opleidingspakket. Door betrokken te worden bij projecten kom je in contact met verschillende diensten en leer je de ruime mogelijkheden binnen BASF snel kennen. Er is dus voor ieder wat wils en veel ruimte om jezelf te ontwikkelen en te blijven uitdagen!

- Engineer on the engineering department (depending on specialization)
- Junior maintenance manager
- Junior asset manager
- Junior production manager
- Junior process manager

Bayer Antwerp Site

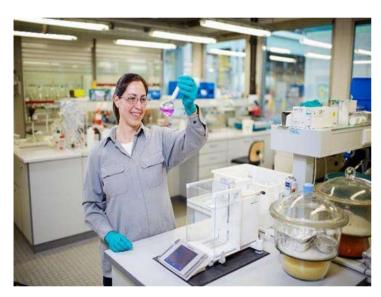

About Bayer

Bayer is an innovating world class enterprise with more than 150 years history and core competencies in health and agriculture.

We develop new molecules that we use in innovative products and solutions to improve the health of humans and plants. Our research and development activities are based on an in-depth knowledge of the biochemical processes in living organisms.

We act sustainably, ethically and socially responsible, taking into account the interests of all our stakeholders. Employees with a passion for innovation are given excellent development opportunities at Bayer. Our values play an important role in our daily work and are a guideline in fulfilling our mission. These values are contained in the word LIFE (Leadership, Integrity, Flexibility and Efficiency).

Bayer Agriculture Antwerp

Bayer Antwerp has approximately 750 employees. Chemicals are produced by 5 production units. These production units belong to Bayer, Flexsys, Eastman and Henkel.

Flexsys is a global manufacturer of rubber adhesives that make rubber products including tires safer, last longer, and perform better.

Eastman is a multinational company that produces a wide range of chemicals including PVB film for the production of safety glass but also coatings, inks, specialty plastics, fibers, etc.

Henkel Adhesives is a leading global manufacturer of adhesives, synthetic polymers, electronic materials, and others.

Supporting services and Guest operations

The supporting departments on the Antwerp site belong to Bayer, but also have a service-oriented function towards the guest operations. More specifically, it concerns the following departments: lab, logistics, maintenance and engineering, security service, human resources, accounting, utilities and IT. All (about 750 permanent) employees, working at the Bayer site in Antwerp have a Bayer status.

EIT

COMPANY INFORMATION

DEME is a world leader in the highly specialized fields of dredging, marine engineering and environmental remediation. The company can build on more than 140 years of know-how and experience and has fostered a pioneering approach throughout its history, being a front runner in innovation and new technologies.

DEME's vision is to work towards a sustainable future by offering solutions for global challenges: a rising sea level, a growing population, reduction of CO2 emissions, polluted rivers and soils and the scarcity of natural resources. Although DEME's activities originated with the core dredging business, the portfolio diversified substantially over the decades, including dredging and land reclamation, solutions for the offshore energy market, infra marine solutions and environmental solutions.

While the company's roots are in Belgium, DEME has built a strong presence in all of the world's seas and continents, operating in more than 90 countries worldwide. DEME can rely on 5,200 highly skilled professionals across the globe. With a versatile and modern fleet of over 100 vessels, backed by a broad range of auxiliary equipment, the company can provide solutions for even the most complex projects.

DEME achieved a turnover of 2.51 billion euros in 2021.

RECRUITMENT OFFER

Deme is an international market leader for marine engineering works such as dredging and land reclamation, port construction, environmental solutions and construction of offshore wind farms. We have a well-respected worldwide reputation for being able to offer solutions for complex projects. Thanks to an integrated company structure, DEME strongly emerges as a global solutions provider and an innovative player in the maritime industry. DEME offers an attractive, multicultural and openminded working environment in which your talents and competences will be stimulated continuously.

DOSIGN ENGINEERING

- @ info.be@dosign.com
- Antwerp Berchem

ВШН

COMPANY INFORMATION

Dosign is a project sourcing and consulting firm specializing in highly skilled technical employees (white-collar workers) active in various sectors such as Pharmaceuticals, Energy, Chemicals, Petrochemicals, Food, Oil & Gas, Infra, Installation, etcetera. Our activities focus on R&D, Engineering, Project and Construction Management.

Our disciplines are:

- Industrial Automation
- · Mechanical Engineering
- Electrical Engineering & Instrumentation
- Process engineering
- · Piping & Mechanical
- HVAC
- Civil engineering & construction
- Steel construction

On the one hand, we put our "Dosigners" on long-term projects; on the other, we have an option whereby you can join the same company after +/- 1-2 years.

RECRUITMENT OFFER

Dosign values 3 things: mentoring, training and a one-on-one approach.

Mentoring is about helping you find an interesting position with one of our clients. As a consulting firm, we can also help you with everything related to: holiday, sick leave, youth leave, etc. Because of our extensive knowledge we can also give you work related advice on any subject.

Training: Every employee with us is offered high-end & in-depth trainings/traineeships. Our European recognized training institute (Dosign Academy) has high level custom-made traineeships, for example: Management Development Traineeship, Piping Traineeship, Instrumentation Traineeship and Construction Management Traineeship. If you follow one of these traineeships, you put yourself in an extra strong position, both now and for the future.

One-on-one approach. Every consultant with us has the necessary technical knowledge and network to help you find your dream job.

WHO ARE WE?

At Easi, we embody Human Excellence.

As an IT service provider our clients' needs become our needs and we work together until all of us are happy with the result. We go beyond the issues our clients face, and make all their goals a reality.

Even those they didn't know they had! We're not just a supplier, we're a partner. We are passionate about what we do, and we're proactive in offering our clients our help.

OUR MISSION

We strive for a collaborative future where people work smarter by sharing human intelligence in a world of automated technology. In that future, we want to establish long-term relationships with our customers in which we always think one step ahead.

We help people to develop their own approach while freeing them up by taking timeconsuming processes off their plates. This allows us to bring them to their full potential.

WHAT KINDS OF JOBS DO WE OFFER

At Easi, there are 3 main types of jobs:

- Technical: Security Engineer, Network Engineer,
 System Engineer, Technical Engineer, etc.
- Business: Consultant, Sales Development Rep, Account Management, etc.
- Staff: HR, Finance, Marketing, Reception, Legal, etc.

Every position comes with growth opportunities based on your own ambition and performance. You can become an expert in your field, a team manager, or a project manager.

It's up to you to show all your strengths and to climb the ladder quickly!

BMT

COMPANY INFORMATION

We make the world a smarter place!

easics is the reference in smart electronic systems design. Our customers are world-leaders in their field. They give us interesting and rewarding challenges for first-of-a-kind applications. Take for example: neural net inference at the extreme edge, a radiation-hardened camera for earth observation satellites, top-notch hearing implants helping newborns and grandmas alike, power-harvesting wireless tags, ...

We discuss the complex algorithms and requirements with our customers and turn them into cuttingedge reality, solving the challenges inherent to silicon implementations. We model these challenges in software and optimize all layers of abstraction. Trade-offs in performance, power consumption and area are made along the way, resulting in the physical realization: an FPGA, a System-on-Chip or a custom-tailored ASIC at the heart of our customer's products.

RECRUITMENT OFFER

Looking for: Digital Design Engineers and Field Application Engineers We'll make you an expert, no worries!

Whether you are an eager starter having just obtained your Master's degree or a seasoned professional, we'll guide you through our design methodology and introduce you to our vast body of expertise. easics is known to be a 'learning' company, one that will give you the chance and time to become an expert, no matter what your previous experience is. You will join the easics academy from day one.

You will work on projects in diverse domains, making high-level models, mastering the intricacies of timing and parallelism, running tests in our lab or discussing requirements and architecture with the customer. Our people work in teams with high autonomy, and they are always ready to help each other out.

COMPANY INFORMATION

IPCOS' digital portfolio includes:

Industrial companies seek to minimize their ecological footprint, simultaneously striving to optimize plant performance and remain competitive on the global stage. To reach those ambitious goals, companies invest in digital programs, leading to sustainable manufacturing.

IPCOS' mission is to support process industry customers in digitalizing their plants and optimizing their processes. We tailor project delivery to customer needs from the plant operational level to the corporate level.

Industrial Data Management: No automation, optimization or reporting is possible without the

Digitization and automation of operations: We implement PID tuning and Advanced Process

We strive to maintain real-time parameters by automating data gathering and processing, contributing to minimized emissions, increased safety, and reduced alarms and shutdowns.

Management of operational performance: We create solutions to track Overall Equipment Efficiency to allow for predictive maintenance or quality monitoring. The delivery of performance

Improvement and optimization of production processes: We deliver modelling and analytics

Reporting on and monitoring of performance: We automate the dissemination of information to corporate systems (ERP, HSE, legal, finance...) to give management insights into production rates,

right data. We develop data integration to support data sharing across all assets.

dashboards keeps the production engineer abreast of their asset's performance.

Control solutions to maintain optimum plant operations.

solutions for optimized processes and predictability.

RECRUITMENT OFFER

emissions, HSE...

A typical IPCOS Digital Asset Project Engineer holds an MSc in engineering, combined with a profound interest in digital technologies and strong analytical skills. They also have a strong motivation to develop an excellent understanding of the processes they optimize.

Are you keen on performing a technical consultancy role, in which you can apply your engineering skills whilst implementing state-of-the-art digital technologies? Are you excited about working in a diverse and international environment? Reach out to us!

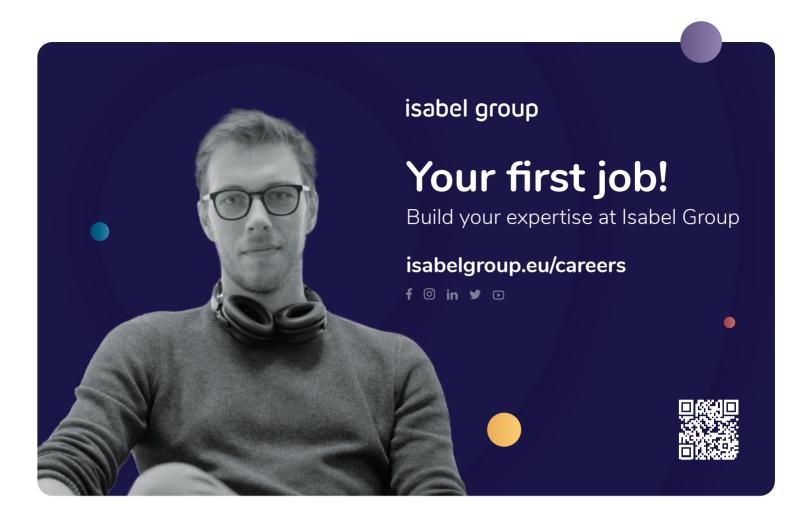

It takes **guts** to **challenge**, **decide** and **execute**.

COMPANY INFORMATION

Since 1995, Isabel Group has grown as a Belgian company and as one of the most important providers of multi-bank services for professional users.

We have become the largest fintech company in Belgium.

Recognized as 'trusted market infrastructure', we are a reliable and solid link between the corporate world, accountancy firms, banks, software suppliers and consumers.

With more than 350 experts and a driven focus on the corporate world, we offer our clients a full range of financial solutions and support at every step on their journey.

RECRUITMENT OFFER

Our team of 350 highly motivated people who make fintech possible for thousands of businesses. Are you growing? Then we will grow with you. Every project, training session and experience helps you to learn and discover.

Time and resources? We happily invest them. All so that you're able to aim high and build up an inclusive, respectful and diverse team.

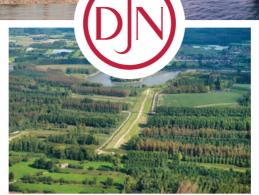

JAN DE NUL GROUP SHAPES BOTH WATER AND LAND

We enable the production of offshore energy and maintain the depth of waterways. We build new ports and create extra land. We realise complex infrastructure works and erect any type of building. We tackle pollution in whatever form. For many generations already, the De Nul family invests in its people and in having its own equipment. We have a passion for business but also want to do things our way, which gives us a unique edge within the sector.

TECHNICAL SUPERINTENDENT LEONARDO SANTOS

"EXPAT, EXPATER, EXPATST"

'I wanted to work in an international setting. And so, it goes without saying that I was delighted to start work with the Jan De Nul Group immediately after my studies.'

'I never really settled in Belgium. Nor anywhere else, for that matter,' Leonardo says with a laugh. 'I live out of my suitcase and I think that's great. Two months at work, one month 'at home', what's in a name?' From Argentina to Ghana, Leonardo has worked in about twelve different countries over the last two and a half years. 'Working in an international team on projects all over the world makes my job very exciting.'

JUNIOR TENDER ENGINEER OFFSHORE RENEWABLES

SIMON BOSTEELS

"VERY EXCITING YEARS ARE AHEAD OF US IN THE OFFSHORE SECTOR!"

My mission starts when our client issues a tender to construct offshore foundations or wind farms. Based on a profound analysis of the tender documents and taking into account the client's requirements, I start working on an optimised quotation for the client. I work in close cooperation with other JDN departments, e.g. Legal, Finance, Procurement, etc... They give input from their area of expertise, which I then integrate into our quotation. By doing so, we can guarantee that the overall picture is correct.

SURVEYOR
WOUTER PERSOONS

"IN OUR JOB, EVERYTHING HAS TO BE AS ACCURATE AS POSSIBLE"

Me, a perfectionist? I don't really have a choice. In our job everything has to be accurate, otherwise no one knows what is really going on during the works. Surveyors provide detailed maps and volume calculations for dredging projects. The operation colleagues base their entire dredging strategy on this information. Hence, it should not surprise you that we perform some of the calibrations five or even six times in order to work as accurately as possible.

ВШН

CIT

COMPANY INFORMATION

Kapernikov is an IT consultancy firm whose goal is to better manage data. We specialize in machine vision and data intensive applications. In 12 years, we have grown to a team of 35.

СШ

We work for utilities, manufacturers and machine builders. We run operational intelligence projects that provide insight into industrial processes, and machine vision projects to improve the performance of machines and operators.

ENER

We start from our customers' objectives, select appropriate technologies and develop customized solutions. We love to work in teams of Kapernikov and customer colleagues. We prefer projects with a meaningful and sustainable outcome.

ELT

Continuous learning, a pleasant atmosphere and a good work-life balance are paramount. And everyone has a say in company management, applying Sociocracy 3.0.

РЫШ

FEB

RECRUITMENT OFFER

In the field of data engineering you extract and transform data from various sources and feed them into a target system. We often work with a mix of the customer's and our own preferred technologies.

MELE

We apply an architecture based on modular containers. In many cases, the architecture will be deployed on a public cloud, in other cases on premise.

штш

Problems are rarely solved by technology alone. You manage your projects in an agile way, in tight collaboration with the customer.

TEITIE

Machine vision is a fascinating field where optics, sensors and deep learning come together. Most projects Kapernikov tackles are not solvable by off-the-shelf machine vision products.

OTHERE

We are looking for machine vision and machine learning engineers who can do more than training a model with a new dataset. With a thorough understanding of both classical machine learning and deep learning, loving to follow the state-of-the-art. Balancing between quickly trying multiple approaches to see what actually works with real world data and focusing on an approach to make the most of it. Loving to see real-world problems being solved by a model you developed and trained.

FBIW

THE FUTURE STARTS HERE. JOIN NXP

Joining NXP Semiconductors means taking a journey into the future, both professionally and personally. As a major global technology player, our ICs and their software enable the smart applications that are changing the world. As an ambitious team of professionals operating in an exciting and international industry, we are always looking for passionate, talented people who will embrace the freedom and challenges we provide.

About NXP Semiconductors, Belgium

With our ICs and their software, we aim to lead in the markets for hearing aids and implants, hearables, wearables, and personal health monitoring applications also known as healthcare IoT.

Our activities cover the domains of audio, sound and acoustics, connectivity systems, security and privacy, and ultra-low power solutions for medical devices. The NXP Personal Health Product Line is headquartered in Leuven, the second best city in Europe for youngsters to live.

The Product Line Personal Health creates 3 categories of products:

- 1. Ultra-Low Power DSP and Machine Learning ASICs for hearing aids,
- 2. Smart Sensors, and
- 3. Ultra-Low Power Smart BLE Radios.

Product Line Personal Health (PL PH) has a history of about 25 years creating DSPs tuned to the needs of the leading hearing aid manufacturers. Now we are extending the ASICs with embedded machine learning functionality. The team in Leuven is the owner of the CoolFlux DSP architecture.

We developed the <u>NTAG® SmartSensor</u>, a single-chip solution that combines NFC and autonomous sensing, data processing and logging. Now we are working on Smart Sensors with BLE radio to log body parameters. With the <u>NxH3670</u>, PL PH has created a small, very power efficient BLE radio. As our radios have a very low latency, a lot of gaming accessory manufacturers are using our ICs for wireless gaming headsets.

Since our department of 40+ engineers is growing, we have challenging opportunities for software engineers, digital chip designers and RF engineers.

<u>NXP Belgium</u> is a very innovative site, stimulating creativity in various ways. This leads also to a high number of patents filed by our team resulting in an impressive patent wall.

NXP in Our Community

Partnerships in Education

NXP Belgium collaborates with universities in Belgium offering students real-world experience through internships and providing Master's students with thesis assistance. We participate in annual job fairs and hire graduates from our Belgian universities.

R&D Community

In 2020, the European Commission declared Leuven to be the European Capital of Innovation and NXP is proud to be a part of this environment of invention. We are a member of Leuven MindGate, a cooperation between the government, local companies and knowledge institutions focused on elevating Leuven as a top destination in health, high-tech and creativity. Finally, The Katholieke Universiteit of Leuven ranks first on the list of Leuven is home to Leuven is home to Leuven is home to Leuven most innovative universities in Europe and Leuven is home to Leuven most innovative universities in Europe and Leuven is home to Leuven most innovative universities in Europe and Leuven is home to Leuven most innovative universities in Europe and Leuven is home to Leuven most innovative universities in Europe and Leuven is home to Leuven most innovative universities in Europe and Leuven is home to Leuven most innovative universities in Europe and Leuven is home to Leuven most innovative universities in Europe and Leuven is home to Leuven most innovative universities in Europe and Leuven is home to Leuven most innovative universities in Europe and Leuven is home to Leuven most innovative universities in Europe and Leuven innovative universities in

Career development

NXP fosters a culture appreciating employees taking initiative. We offer various paths through your career. Our Career Ladder helps employees progress equally within their specialty: following the path to Technology Expert, growing to be the technical lead that is responsible for the system architecture of our products, becoming a Master in Project Management, or taking the Line Management route to lead people, functions, and businesses.

You can find all our vacancies on the NXP <u>career site</u>.

PEC

- @ jobs@peccorp.com
- # Haasrode (Leuven)

BMT

COMPANY INFORMATION

PEC is an international technology supplier with presence in Europe (Belgium, Hungary, Germany), the United States, China and Japan. We are a global leader in Test and Manufacturing Equipment for advanced Batteries and Cash Automation, serving key players in these domains.

In our energy storage division, PEC employees are working on the technology and equipment for the development and manufacturing of tomorrow's renewable energy storage. For more information, visit us at www.peccorp.com.

Be part of an international, multicultural team in a high tech environment. Don't stay at home - travel around the globe for your challenging job. Develop yourself while working on exciting projects that will change the world.

RECRUITMENT OFFER

Working for PEC means you will be a part of an international key player that will contribute in building the battery factories, which will play a key-role in the transformation to a carbon free society.

- You'll have a compensation package based on the market and related to your experience
- You will have a permanent employment contract offering you security and stability
- A chance to engineer your own future and grow and develop yourself in a dynamic and international company that focuses on innovation and customer satisfaction.

Together, we're working to find answers.The whole world is waiting to hear them.

Pfizer owns collaboration.

Future Leaders in Manufacturing

Functieomschrijving:

Door interne verschuivingen en een **enorme expansie**, zijn we op zoek naar het **toekomstig leidinggevend talent** binnen onze productieafdelingen.

Je zal starten in een niet-leidinggevende functie om zo de organisatie met haar eigenheden en processen beter te leren kennen. Hierbij krijg je de kans om mee bij te dragen aan volgende activiteiten:

- Productieplanning
- Inplannen & begeleiden van alle technische activiteiten aan de lijnen
- Opvolgen van dagelijkse operationele review activiteiten
- Identificeren en analyseren van bottlenecks, kwaliteits- en rendementsverliezen
- Voorstellen van eventuele verbeteringen
- Uitvoeren van verbeteringsprojecten en (meewerken aan) de verdere optimalisatie van onze processen.

Afhankelijk van je eigen inwerkperiode **groei** je **geleidelijk** door tot een teamverantwoordelijke binnen jouw afdeling. Je **evolueert** naar één van de **belangrijkste aanspreekpunten** binnen en buiten jouw afdeling en geeft hierbij rechtstreeks **leiding** aan de (technisch) operatoren. Als **eindverantwoordelijke** binnen jouw shift ben je verantwoordelijk voor de veiligheid van de operatoren, de kwaliteit van het product en het tijdig afwerken van de producten en de samenwerking binnen de teams.

Op deze manier leg je een stevige basis over de werking van een aseptische productieplant.

Vanuit een breed en kwalitatief aanbod van **leadership development initiatieven** word je extra ondersteund in het traject naar leidinggevende.

Afhankelijk van jouw eigen interesses kan je, binnen onze organisatie, **verder doorgroeien** binnen productie, planning, engineering, kwaliteit, veiligheid- en milieu of binnen een meer internationaal georiënteerde functie.

Organisatie:

Onze site in Puurs is de grootste productie- en verpakkingssite van Pfizer in Europa. Elke dag worden er meer dan 1 miljoen injecteerbare geneesmiddelen en vaccins geproduceerd en verpakt. Een derde van onze productie is **bestemd voor ontwikkelingslanden.**

PFIZER MANUFACTURING BELGIUM

- @ naomi.vandenabbeele@pfizer.com
- Puurs

COMPANY INFORMATION

Pfizer Puurs produceert en verpakt dagelijks meer dan 1 miljoen en jaarlijks meer dan 400 miljoen inspuitbare vaccins en geneesmiddelen. De hoogtechnologische site in Puurs is daarmee de grootste Pfizer-productiesite in Europa en de 2e grootste productiesite van Pfizer wereldwijd. De productie en verpakking samen hebben een oppervlakte van 270.000m². Dit komt overeen met 55 voetbalvelden. Het bedrijf behoort tot de wereldtop in aseptische productie en verpakking, en wil dat verschil blijven maken in het leven van patiënten wereldwijd. Bovendien is Pfizer Puurs de belangrijkste producent van vaccins (o.a. tegen pneumokokken) voor ontwikkelingslanden: het bedrijf produceert jaarlijks 100 miljoen vaccins die, in samenwerking met Unicef, Gavi en de Bill & Melinda Gates Foundation, ter beschikking gesteld worden aan ngo's en patiënten in ontwikkelingslanden.

De afgelopen jaren is de site in Puurs substantieel uitgebreid. Zo werd er in vijf jaar tijd meer dan 700 miljoen euro geïnvesteerd. Deze investeringen zijn niet enkel gericht op productie. Zo zetten we bijvoorbeeld sterk in op groene energie op met onze windmolens, zonnepanelen en warmtekrachtkoppeling.

Voor onze productiesite in Puurs zijn we constant op zoek naar technisch operatoren, techniekers, industrieel ingenieurs, burgerlijk ingenieurs, bio ingenieurs, laboranten en masters in de farmaceutische wetenschappen.

Bij Pfizer Puurs kom je terecht in een innovatieve, mensgerichte, expansieve en hoogtechnologisch omgeving waar autonomie en persoonlijke ontwikkeling belangrijk zijn. Dit in een no-nonsense bedrijfscultuur waar ondernemerschap, toewijding, respect en transparantie belangrijke waarden zijn.

RECRUITMENT OFFER

Voor onze productiesite in Puurs zijn we constant op zoek naar technisch operatoren, techniekers, industrieel ingenieurs, burgerlijk ingenieurs, bio-ingenieurs, laboranten en masters in de farmaceutische wetenschappen.

Consultant - Extern Veiligheidsdeskundige Wijgmaal (Leuven)

Sertius is een snelgroeiend consultancykantoor inzake milieu- en veiligheidsadvies, zowel op nationaal als op internationaal niveau. Kwaliteit, snelheid, integriteit en multidisciplinaire activiteiten zijn het DNA van onze onderneming. Tevredenheid bij zowel onze klanten als medewerkers staat altijd centraal.

Sertius telt 70 medewerkers, verspreid over 4 vestigingen: Wijgmaal (Leuven), Drongen (Gent), Louvain-la-Neuve en Namen.

Sertius staat in de markt bekend voor het begeleiden van complexe omgevingsprojecten. Om te beantwoorden aan de noden van de klant hebben we hiervoor juristen, veiligheidsdeskundigen, bodemdeskundigen, milieucoördinatoren, MER-coördinatoren en MER-deskundigen in huis. Variatie in de job, interessante projecten, training-on-the-job, een leuke werkomgeving, ... krijg je gratis mee.

JOBINHOUD VAN EEN CONSULTANT EXTERNE VEILIGHEID:

- Opmaken van veiligheidsstudies/veiligheidsrapporten voornamelijk in verband met gevaarlijke stoffen (Seveso),
- Openstaan om zich bijkomend te verdiepen o.m. in de problematiek aangaande de veiligheidsrapportering van onze gereputeerde industriële klanten (BASF, Janssen Pharmaceutica, Lanxess, Evonik, ...)
- Uitvoeren/begeleiden van risicoanalyses (HAZOP, PLANOP, ...),
- Medewerker in het uitbouwen van de activiteiten en de diensten inzake veiligheid die Sertius levert.

WIE ZOEKEN WE?

- *Opleiding en kennis:* Universitair diploma (burgerlijk ingenieur) of diploma hoger onderwijs lange type (industrieel ingenieur),
- *Leergierig:* Belangstelling voor procesindustrie, chemische processen en de ermee samenhangende risico's, ... Kennis inzake procesveiligheid is een voordeel
- Enthousiasme: Je bent dynamisch, gedreven, vlot en kan zowel zelfstandig als in teamverband goed functioneren.
- Ingesteldheid en motivatie: Je denkt en werkt klant- en oplossingsgericht, je bent kwaliteits- en veiligheidsbewust.
- Talenkennis: Nederlandstalig (met noties van Frans en Engels).

ONS AANBOD

- *Opleiding en kennis:* We bieden je de mogelijkheid om jezelf verder te ontwikkelen. Je kan autonoom projecten beheren en samenwerken met ervaren projectleiders.
- Collegialiteit: Naast een leuke werksfeer staan ervaren collega's klaar om enthousiast hun kennis over te brengen.
- Variatie: Je werkt samen in teams op uitéénlopende projecten in verschillende sectoren.
- Aantrekkelijk loonpakket: Bovenop een aantrekkelijk loon krijg je heel wat extralegale voordelen: een bedrijfswagen en tankkaart, onkostenvergoeding, groeps- en hospitalisatieverzekering, ... Telewerken (2 à 3 dagen per week).

sertius

COMPANY INFORMATION

Sertius has more than 70 employees who guarantee a multidisciplinary approach. This multidisciplinarity is concretised, on the one hand, by the presence of technical experts for all important safety and environmental health aspects and, on the other, by the presence of environmental lawyers who work closely with the engineers.

This technical-legal approach to projects is Sertius' DNA. Our philosophy is that, in most cases, an environmental/safety problem has a technical and legal facet, both of which cannot be separated. Sertius offers this integrated service to both the private - and the public sector.

Key strengths:

- Multidisciplinary approach (legal-technical) to environmental problems.
- Extensive practical experience
- Flexibility and speed
- Thinking and working together with the client
- Good relations with the authorities
- Practical focus and great problem-solving ability

RECRUITMENT OFFER

Sertius is a fast-growing environmental and safety consultancy firm. Satisfaction among both our clients and employees is always our main focus.

To meet the client's needs, we need in-house lawyers, safety experts, soil experts, environmental coordinators/experts.

Variety in the job, interesting projects/clients, training-on-the-job, a nice working environment, ... you get for free.

SIEMENS DIGITAL INDUSTRIES SOFTWARE

- 17 https://www.sw.siemens.com/en-US/
- @ nele.craeghs@siemens.com
- Leuven

COMPANY INFORMATION

Siemens Digital Industries Software is a leading global provider of product lifecycle management software and services with fifteen million licensed seats and more than 140,000 customers worldwide. Siemens Digital Industries Software collaborates with companies to deliver open solutions, helping them make smarter decisions that result in better products.

RECRUITMENT OFFER

Siemens Digital Industries Software is looking for Graduate Engineers for different roles:

- Research engineers (ADAS domain Additive Manufacturing Data Mining/Machine Learning)
- Software engineers with curiosity about Simulation software and tools
- Project test engineers in the domain of Noise and Vibration
- Siemens Digital Industries Software Where today meets tomorrow.

Our preferred candidates have this 'profile':

- MSc. or PhD in Engineering (Computer Science, Mechanics or Mechatronics)
- Proficient in spoken and written English in view of collaboration and reporting
- Skilled in programming languages such as Python, C, C++
- Interested in building new automotive applications
- interested in the domain of Noise and Vibration
- A creative and critical attitude towards technical problems.
- Motivated to work in a pro-active way and can work independently within the team.
- Let's connect and leave your CV on this link by applying as Graduate Engineer!

Our mission

There is no telling what technology can do. Its opportunities are infinite.

While innovation is fascinating, it also raises questions as to what is behind the race for new ideas and change. The answers are not always obvious or simple.

At Sopra Steria, our mission is to guide our customers, partners and employees towards bold choices by leveraging digital technology to build a positive future for all. We believe in technology, but also in our ability to use our collective intelligence to help the world move forward.

Together we are building a decisively promising future by delivering tangible results: lasting solutions that have a positive impact and fully integrate interactions between the digital world and society. We are just at the start of what we can achieve together.

Sopra Steria. The world is how we shape it.

Bolder together

At Sopra Steria, we strive to create an inspiring team environment and an arena for freedom and discussion that fosters skill development and entrepreneurship within a community driven by our desire to succeed together.

In addition to technology, we believe that collective intelligence, team spirit and everybody's individual talent, can help to transform and move the world forward on a lasting basis.

We encourage our employees to be bold, curious, and accountable in order to explore new avenues and capitalize on innovative technologies, which will bring positive change for all. We offer all our employees the opportunity to grow and improve their skills through a variety of experiences with top European companies.

Joining Sopra Steria means being part of a people-centric adventure within an independent Group that uses digital technology to its full potential to build a positive future for all.

Our commitments

At Sopra Steria, we believe that collectives and diversity are strengths for our Group. With our employees, customers, and partners, we pursue a resolutely committed social policy in all the Group's geographical areas.

SYNOPSYS

- www.synopsys.com
- @ leuven_careers@synopsys.com
- Leuven

SYNOPSYS®

Silicon to Software

COMPANY INFORMATION

Synopsys is a worldwide leading supplier of electronic design automation (EDA) tools and semiconductor intellectual property (IP). These key technologies are used every day by electronic companies around the globe, to design advanced semiconductor chips that power today's smart electronic products. Synopsys is headquartered in California and has more than 18,000 employees worldwide, the majority being engineers.

Synopsys Belgium, based in Leuven, is an important R&D center developing and supporting EDA and IP technologies for embedded programmable processors integrated in semiconductor chips:

- Leuven is the R&D headquarters of the "ASIP Designer" product line, an EDA tool to design application-specific instruction-set processors (ASIPs). The tool is powering hundreds of chips in exciting electronic products, e.g. for smart vision, wireless communication (5G, Wi-Fi), network equipment, smart audio and video, hearing aids, and automotive systems.
- Leuven hosts the system engineering R&D team of Synopsys' "Embedded Vision" product line. This is a semiconductor IP product using artificial intelligence techniques to enable smart camera's and self-driving cars.
- Leuven hosts an engineering team developing and supporting EDA tools for virtual prototyping.
 This is a methodology for modeling and validation of semiconductor chips during early stages of the design process.

RECRUITMENT OFFER

Synopsys is seeking enthusiastic and creative engineers to strengthen its R&D team in Leuven. We offer a stimulating work environment with international contacts. You become exposed and contribute to chip designs from many of the world's leading electronic companies who use our technologies to create new, exciting smart electronic products. You will work with highly professional and motivated colleagues who value your contribution. We offer flexible work schemes and an attractive remuneration package. We embrace diversity in every aspect of our business, so we can create solutions that serve not just technology but the humans behind it.

Typical job profiles in Leuven include:

- Software engineers, developing, enhancing and maintaining tools for the ASIP Designer product line.
- Application engineers, assisting ASIP Designer customers in their development of advanced semiconductor chips with ASIPs.

The Synopsys team in Leuven is cooperating closely with other Synopsys sites, such as Eindhoven (the Netherlands) and Aachen (Germany). If you are interested in working outside of Belgium, we will be happy to refer you to job opportunities at those Synopsys sites.

- To provide feedback to design and lead smart standardization deployment
- · To define the equipment standards
- To lead the change management & validation processes
- To lead and build the capability of process failures technical troubleshooting
- · To lead process benchmarking & reapplication

PREFERRED

· You are bi-lingual Dutch/English

OTHER EXPECTATIONS

- Spend 80% of his/her time on the floor.
- · Become a technical expert for a designated process.
- · Qualify on all basic operating roles.

WHAT DO I NEED TO DEMONSTRATE?

- · Design, implement and maintain systems to collect and analyze data for critical product and process parameters.
- · Use this data to identify process losses.
- · Work with line management to prioritize improvement opportunities.
- Eliminate or reduce (prioritized) losses through making process or work system changes.
- Participate in the daily direction-setting process report results, flag issues and request resources.
- Own critical daily management systems, e.g. centre-lining (run-to-target).
- Use Reliability Engineering tools to drive center-lining and loss elimination
- Standardize equipment and work processes. Own the change management system for a designated process.
 Update process control strategies and operating procedures as changes occur.
- · Share and reapply learning across processes, modules and plants.
- · Prepare and give training on process/equipment changes.
- Develop him/herself through participating in corporate and external training.

WHAT ELSE DO I NEED TO KNOW?

If you experience any difficulty when applying, please contact hrsharedservice@kellogg.com.

Please note that the closing date may be subject to change. We will interview suitable candidates as they apply, so please don't hesitate to take this opportunity to submit your application as soon as possible.

If you would like to be immediately notified of new Kellogg's opportunities, please go to 'Create or access my profile' and complete the information required in the 'Job Alerts' section. You will then receive email alerts as soon as new jobs are advertised.

The Kellogg Company is an Equal Opportunity Employer who strives to provide an inclusive work environment that involves everyone and embraces the diverse talent of its people.

During our information security masterclass, we learn (theoretical and practical) you the ins and outs from information security and we do not forget the soft skills

IXOR

- r www.ixor.be
- @ taoufik.elmahmoudi@ixor.be
- Schuttersvest 75, 2800, Mechelen

COMPANY INFORMATION

Ixor is a fully independent software company. It has been for 20 years now. Here are the 3 certainties acquired over that time period. 1. Excellence needs time. Speed and quality rarely make a good blend. We'd rather take a bit more time to build (y)our product, than entering the rat race. 2. Stability is the foundation of our business. Remain calm and focused, no matter the pressure. That's what our experts manage on a daily basis. 3. In Ixor we trust. Both customer and colleague. We have proven to have the capabilities and knowledge to find solutions. Up to you to keep challenging us.

RECRUITMENT OFFER

Become part of a company which has its eyes set on success. Both in IT development, as well as your personal development. At Ixor, you have the chance to work on big projects in small teams of 6-8 persons. Our clients are well-known players in the financial and governmental sector (Bank Van Breda, BNP PariBas Fortis, Vlaams Verkeerscentrum), but we pride ourselves on developing our own products too. You may know us as the people who made Coronalert and Doccle, but the best way to know us is to book a meeting with Taoufik.

MATERIALISE

- | https://www.materialise.com/
- @ Careers@materialise.be
- Leuven

COMPANY INFORMATION

As of the start in 1990 our goal was to enable new uses for the extraordinary potential that 3D printing offers. Since then, Materialise has pursued its experience into a range of software solutions, engineering and 3D printing services, which together form the backbone of the industry. Materialise's open and flexible platforms enable players in industries such as healthcare, automotive, aerospace, art and design, and consumer goods, to build innovative 3D printing applications that make the world a better and healthier place. Headquartered in Belgium, with branches worldwide and over 2,300 employees worldwide, the company has brought together the largest group of software developers in the industry and one of the largest 3D printing facilities in the world. As a growing company, Materialise is always looking for enthusiastic professionals who want to work in an environment full of revolutionary technology and surrounded by people passionate about their work. We offer inspiring and challenging jobs with growth potential in an innovative market. At Materialise, you will be part of a dedicated team within a dynamic company that highly values openness, trust and team spirit. Ultimately, we empower our customers to transition towards a digital manufacturing process and to launch innovations that have the potential to forever change the face of their industry. That's what keeps us pioneering, why it's so important to encourage, inspire and co-create a better and healthier world.

SKYEBASE

- https://skyebase.be/
- @ info@skyebase.be
- # Antwerp

COMPANY INFORMATION

SkyeBase supports asset owners and maintenance managers in the industry, container terminals, and infrastructure by combining Drones, Robotics and Al. Data captation is accomplished through drone inspections and high-tech imaging and measurement equipment. Data is processed through I-Spect, the asset inspection platform of SkyeBase, which is supported by artificial intelligence for faster and more accurate image processing. This is done to obtain crystal-clear insights into the condition of assets and to take (preventive) maintenance decisions.

RECRUITMENT OFFER

Become part of a fast-growing scale-up in a super exciting and growing market (Drones & AI). Together with our international partners, SkyeBase is a frontrunner in the development and deployment of new technologies in sectors of Drone Technology, Data Technology and Digital Transformation. (DT³). Therefore, we are looking for profiles in a wide range of disciplines like Civil, Industrial and Computer Engineers.

So, if you want to become part of our story, are up for a challenge and desire to have a meaningful impact by shaping the future of how drones are being used for a more sustainable industry, visit our stand.

SOUDAL

- r http://www.soudalgroup.com/
